[HAPPENING 12/18/20 - SCIENTIFIC PROOF OF DOMINION FRAUD? Explanation video and attached research paper! AFFIDAVITS SIGNED AND SUBMITTED](#) (And an AMA with the research author!)

posted 4 days ago by [phibetared](#) +16 / -0

This may be scientific proof of fraud incorporating voting machines from Dominion Voting Systems.

After 6 weeks of work, and help from countless people (slowcrash, filenile, scooterdog, epic, redmeateater, melsbelz, justice101, algo, chimpstrength and others, forgive me if I didn't mention you) – today is the WORLD PREMIER of the following information, report and video.

I ask for your help sharing and spreading it to everyone you can get it to. The first stop for this information was President Trump's team of lawyers. So yes, they already have this. Affidavits have been signed and submitted. The second stop for this information... is you. Since the failing media outlets refuse to share this important information, it's up to you. ALL State Legislatures need to see this.

DataScience Conducts First Comprehensive Analysis of All 3,143 U.S. Counties' Presidential Election Results

Candidate Joe Biden over-performs expected values in 72% of counties using Dominion Voting Systems

SAN ANTONIO, Texas — A comprehensive statistical analysis of more than 3,000 U.S. counties reveals results that heavily skew towards candidate Joe Biden in locales utilizing Dominion Voting Systems.

The summary report issued today by the anonymous team of data experts known as DataScience detail a statistical model constructed to predict re

\*\*Key Report Findings: \*\*

- In counties using Dominion BMD voting machines, candidate Biden consistently receives 5.6% more votes than would be expected.
- Biden over-performed predicted/expected values in 78% of the counties that used Dominion or Hart machines.

The DataScience analysis also reveals that counties utilizing Dominion and Hart InterCivic ballot counting devices and software consistently gave a 5% vote advantage to candidate Joe Biden over President Donald Trump. This advantage was observed regardless of the county's majority political party affiliation and urban, suburban, or rural area demographics.

The statistical model used in this research has been verified by propensity and other well-known statistical techniques. Additionally, the results have been peer-reviewed by experts on the DataScience team.

“This analysis is the first complete national analysis of 2020 election results from all 3,000 plus U.S. counties, and it clearly shows that counties using machines from Dominion Voting Systems had unexpected results that skewed heavily towards Biden,” according to the anonymous DataScience Statistician that conducted the analysis. “If a networked system of computers were used to fraudulently affect vote counts, we would expect similar outcomes to what has been demonstrated during our research.”

DataScience's analysis strongly suggests systemic election interference and demonstrates the need for further investigation into Dominion Voting Systems and Hart InterCivics voting devices and software used to process election results.

A spokesperson from BASEDMedia said, “Election integrity issues must be thoroughly investigated and resolved so that every voter can accept and trust the outcome.”

Voters are encouraged to contact state legislators and bring any and all evidence to their attention.
